

EXPERIENCE ACCELERATION

At Excelerate Technologies Inc., we bridge global innovation with local market needs, helping organizations unlock growth, resilience, and security in an increasingly connected world. Our leadership team brings over 100 years of combined expertise in ICT, security, and digital transformation — experience that fuels our ability to deliver strategies and solutions that matter.

Through the **Excelerate EDGE™** Framework, we go beyond technology delivery, designing and supporting solutions that create measurable value, safeguard critical assets, and accelerate business performance. This is why customers, partners, and stakeholders trust us to drive faster, smarter, and more secure transformations.

Engage : Building Genuine Alignment and Connection

We start by forging a strong relationship with our customers and partners. Through consultations, needs assessment, and stakeholder alignment, we ensure we fully understand your business objectives, pain points, and priorities.

Excelerate advantage: A collaborative approach backed by years of industry knowledge and access to a global ecosystem of technology and security leaders.

Discover: Uncovering the Best Solutions

Using our global network of best-of-breed ICT and Security partners, we identify, evaluate, and recommend solutions tailored to your unique needs. We benchmark against global standards and local realities to ensure optimal fit and long-term value.

Excelerate advantage: Exclusive access to world-class products, solutions, and services vetted for reliability, scalability, and innovation.

Generate: Designing and Delivering Value

We design an integrated, future-proof solution architecture and implementation plan. This includes procurement, integration, and optimization strategies, ensuring your organization gains measurable results.

Excelerate advantage: Rapid deployment and reduced time-to-value through our expert project management and trusted supply chain.

Execute: Delivering with Excellence

We implement, test, and fully deploy the solution — providing training, support, and continuous optimization. Beyond deployment, we ensure that part of our success contributes to the betterment of the community and country.

Excelerate advantage: A partner committed not only to your business success but also to creating meaningful social impact.

“Experience Acceleration through a trusted, end-to-end ICT and Security journey.”

Solutions That Accelerate Growth

We design and integrate the mission-critical ecosystems that power modern progress. Driven by our six core pillars, Excelerate enables organizations to safeguard their operations and Experience Acceleration at every level.

ICT & Digital Infrastructure Integration

We design and integrate scalable, AI-driven cloud and network architectures to power mission-critical operations and digital progress.

- Cloud, data center, and network architecture
- Custom software development, API integration, and platform modernization
- AI automation and process re-engineering
- Multi-domain systems designed for mission-critical operations

Physical & Cyber Security

We safeguard critical assets with zero-trust architectures and continuous monitoring, building resilience against sophisticated digital threats.

- Threat detection, incident response, and continuous monitoring
- Zero-trust architecture and advanced security platforms
- Resilience solutions that safeguard organizations from evolving risks

Defense, Intelligence & Situational Awareness

We deliver decision superiority through multi-source intelligence fusion, unmanned systems, and forensics for national security operations.

- C4ISR platforms
- Multi-source intelligence systems integrating sensors, SIGINT, OSINT, ADINT, GEOINT, IMINT, and data fusion analytics
- Digital and mobile forensics and operational investigation tools
- Counter-intelligence and electronic countermeasure technologies
- Unmanned systems (drones/UAS) and C-UAS (Counter-UAS)
- Capabilities that strengthen decision superiority, national security, and operational resilience

Representation & Local Market Acceleration

We act as the strategic gateway for global innovators, providing the localization and partnerships needed to succeed in the Philippine market. Philippine market entry for global ICT and Security innovators

- Go-to-market development, ecosystem partnerships, and localization
- Technology enabled marketing and advertising services
- End-to-end support for expanding presence and impact in the region

Training, Capability Building & Enablement

We bridge the gap between technology and expertise with mission-focused training to ensure long-term digital resilience and workforce mastery.

- Technical, operational, and mission-focused training
- Workforce upskilling and certification pathways
- Strengthening local capability for long-term digital resilience

Lifecycle & Managed Services

We ensure mission continuity through dedicated stewardship and managed services that optimize performance and security long after deployment. Continuous optimization and technical stewardship

- Managed cybersecurity and infrastructure services
- Sustaining mission continuity, efficiency, and performance.

Mission

We connect local businesses and institutions to a global network of ICT and Security innovators, delivering best-of-breed solutions through integration, resilience, representation, and empowerment — enabling customers to Experience Acceleration in growth, efficiency, and security. For our global partners, we serve as a trusted gateway to expand presence and impact in local markets. Guided by the Excelerate EDGE™ Framework, we cultivate a collaborative ecosystem that drives customer success, strengthens national capability, and contributes to the Philippines' digital resilience and progress.

Vision

To be the trusted bridge between global ICT and Security leaders and local markets — building a thriving ecosystem where organizations Experience Acceleration through world-class solutions, and partners expand their reach and impact. We strive to give back to our nation by strengthening its digital resilience, advancing security and intelligence capability, and contributing to a safer, more resilient, and progressive Philippines.
